LANGUAGES

- English
- Hindi
- Gujarati
- Japanese (Pre-Advanced)

SKILLS

- JavaScript, TypeScript
- Python, Java
- HTML, CSS
- React, Shadcn
- Node.js, Express
- Django, Flask
- MongoDB, MSSQL
- PostgreSQL, MySQL
- Git, Docker, Grafana, Redux
- NumPy, Pandas, Matplotlib
- Scikit-learn, TensorFlow
- CodeceptJS, Seaborn
- Problem Solving, Debugging

CERTIFICATIONS

Introduction to Java
LearnQuest

Inheritance & Data Structures in Java
University of Pennsylvania

Database Design & Basic SQL in PostgreSQL
University of Michigan

HTML, CSS, and Javascript for Web Developers
Johns Hopkins University

Exploratory Data Analysis for Machine Learning
IBM

Building Generative AI-Powered Apps with Python
IBM

AWS Cloud Technical Essentials
Amazon Web Services

PROFILE

Full-stack software developer with strong experience designing and building scalable, high-performance web applications. Skilled in modern frontend and backend technologies with hands-on exposure to system design, automation, and clean architecture. Actively applies artificial intelligence and machine learning concepts to create intelligent, data-driven features and workflows. Passionate about writing efficient, maintainable code and delivering reliable, production-ready solutions.

EDUCATION

L.J. Institute of Engineering and Technology — **2022 – 2026**
B.E. in Information Technology

Shree Muktajivan Vidhyalaya — **2021 – 2022**
Standard 12th Science

Shree Muktajivan Vidhyalaya — **2019 – 2020**
Standard 10

WORK EXPERIENCE

Websphere Technolabs LLP — **MAY 2025 – PRESENT**
Software Professional Associate

- Building innovative solutions for the pharma and medical industry through a comprehensive low-code/no-code platform that streamlines document workflows.
- Designed and developed end-to-end full-stack applications handling frontend interfaces, backend services, and data flow with a focus on scalability and performance.
- Built reusable components, RESTful APIs, and modular systems following clean architecture and best coding practices.

Websphere Technolabs LLP — **NOV 2024 – APR 2025**
Software Professional Intern

- Focused on learning and implementing generative AI solutions to create intelligent, data-driven workflows and features.
- Explored low-code platforms to enable faster development cycles with minimal resources.

PROJECTS

EXML — *Explore Machine Learning Interactive Learning Platform*

- Interactive web platform with ML guides, live predictions, and dynamic pipeline visualizations.
- Users upload data to get confidence scores, detailed analysis, and hands-on model demos.
- Covers classification, regression, supervised and unsupervised learning workflows.

Tech: Python, Flask, NumPy, Pandas, Scikit-learn, TensorFlow, Seaborn, PostgreSQL, Git

Quickflow — *End-to-End Process Digitalization & Automation for Pharma*

- Low Code/No Code platform for Pharma and Life Science ensuring full USFDA compliance.
- Digitizes business processes across QMS, DMS, LIMS, ELN, BMR with audit trails and RPA automation.
- Supports real-time analytics, version control, and enterprise system integration.

Tech: React, Node.js, Express, TypeScript, MongoDB, MSSQL, Shadcn, Grafana, Git, Docker

QuickTest — *AI-Integrated Automated Software Testing Platform*

- Automated QA platform with video recording, failure screenshots, and detailed error logs per test run.
- Supports multi-product configuration, flexible per-test flow management, and comprehensive reports.
- Features a live information banner during execution for real-time test monitoring.

Tech: React, Node.js, Express, MongoDB, TypeScript, CodeceptJS, Shadcn, MSSQL, Git, Docker
